

6516205832.txt

I am an XM subscriber, and have been for about a year. I travel a lot on business, and although I enjoy the entertainment aspect of XM, I find the traffic and weather feature indispensable. You tune in, and you find out exactly what you need to know, when you need to know it. I can't believe NAB has the gall to complain about infringement on "local" programming, since most stations are owned by national companies. If anything, I'm pissed off at the FCC for relaxing the rules and letting these companies become the monoliths that they are!! Please reject petition 04-160 so I can continue to get the info I need without searching through 50 "local" stations in an unfamiliar area.
